

v1

detection:

selection_img:

- Image|endswith: '\certutil.exe'

- OriginalFileName: 'CertUtil.exe'

selection_cli:

CommandLine|contains: '-encode'

condition: all of selection_*

P1

P2

P3

M₁ — records that raise an alert

3 predicates · 3 literals

v2

+ filter_installer:

+ ParentImage|endswith: '\ccmexec.exe'

- condition: all of selection_*

+ condition: all of selection_* and not filter_installer

P4

M₂ — strictly narrower than M₁

a new predicate removes a slice visible to structural diffing

4 predicates · 4 literals — the condition line changes

v3

filter_installer:

ParentImage|endswith:

- '\ccmexec.exe'

+ - '\SenseIR.exe'

condition: all of selection_* and not filter_installer

M₃ — strictly narrower than M₂

the slice grew; the structure did not invisible to structural diffing

4 predicates · 5 literals — nothing structural moves

one predicate, many literals: appending to a list narrows the matched set without changing the structure

 still alerts

 suppressed
